Personal Projects

Green Banana | Full Stack Developer

· Full stack web application that allows users to upload and share images, URLs, and code snippets.

· Developed a modern UI using CSS Grid, Flexbox, animations, and JavaScript to provide seamless user experience.

· Implemented the Cloudinary API to store and fetch images.

Flaker | Full Stack Developer

· Built using React, JavaScript, NodeJS, MySQL, MongoDB

· Uses recursive queries and full text searching to dynamically display nested comments.

· Focused on using React and implementing a solid database using MySQL.

Portfolio Site | Web Developer

· Converted my original portfolio from an HTML file to a React app implementing Framer Motion for animations.

· Styled with modern CSS layouts using Grid and Flexbox.
